“Project of the Day”: LET Sonnensegel wins the audience vote at Heinze ArchitekTOUR PROJECTS26 in Munich

At its first appearance at Heinze ArchitekTOUR PROJECTS26 in Munich on 14 October 2026, around 200 visitors voted the Berlin sun sail project “Of Eden” “Project of the Day”. The manufactory from Upper Austria presented its electrically retractable sun sails for the first time at the industry event for planners and architects.

Upper Austria, 19 October 2026

Heinze ArchitekTOUR PROJECTS26 brought architects and planners to the Kleine Olympiahalle in Munich on 14 October 2026 for a day of project presentations and guided tours. In total, 59 projects were up for election: 32 from exhibiting companies and 27 from architecture practices. Around 200 visitors voted on site. The winner was “Of Eden” in Berlin, a restaurant terrace on the Spree shaded by LET Sonnensegel with electrically retractable Doppeldreieck sails. The project was planned by architect Dorothee Spitz.

It was LET Sonnensegel's first time at ArchitekTOUR. Since 1999 the company has built one product only in Upper Austria: made-to-measure, electrically retractable sun sails. Motor and spring mechanism sit inside the roller, so the sail stays taut in every position and retracts by itself in strong wind. It is a system that does not hide the architecture but fits into the design. Planning starts with the Digital Visit, a video consultation, and a 3D shade plan.

Quote: “It is wonderful when outstanding architecture and well-thought-out products are shown in use. With its premiere at ArchitekTOUR and the most popular reference, LET has achieved something unique.” — Franz Luft, Senior Account Manager Marketing Strategy & Services, Heinze GmbH *(translated from the German original)*

“Project of the Day” confirms LET's approach of developing sun sails together with planners and architects. More projects, background texts and images are available in the press room at [let-sonnensegel.com/en/press](https://sonnensegel.com/en/press).

About LET Sonnensegel

LET Sonnensegel is a family business from Upper Austria and a manufactory of made-to-measure, electrically retractable sun sails for the DACH region. Since 1999 we have advised, planned, built and installed high-quality shading solutions entirely in-house. Every LET sun sail is developed individually, built in our own workshop and tailored to the architecture, the use and the weather – for private terraces, restaurants, hotels and demanding architectural projects.
